

TECHNICAL DUE DILIGENCE

By Georgia & Molly

For a quick overview or in-depth analysis of a company's technical assets, risks, and potential impact on valuation, we've got you covered. Trust our proven methodology to deliver a structured report for informed decisions.

Georgia & Molly specializes in complex systems that integrates hardware and software. With over 70 years of combined experiences and degrees from top-ranked universities, our crew brings a unique dual perspective, understanding thorough evaluations and stakeholder needs.

Customer Testimonial: ***"Without Georgia & Molly's extensive technical knowledge and humble approach we would not have been able to execute as swiftly as we did"*** - Espen Digernes, Owner Cake

<p>Foundations: Hardware, software, tools, and external systems visualized through infrastructure charts.</p>	<p>IP & Licensing: Reviewing how robust the patents are and exactly what they cover.</p>	<p>Opportunity: Assessing the competitive landscape to understand the uniqueness of a solution.</p>
<p>Scalability & Future Technology: Assessment of growth readiness and next-generation solutions.</p>	<p>Product & System Health: Understanding key dependencies and potential risks.</p>	<p>Operational Excellence: Evaluation of process maturity, [including AI integration].</p>

After your investment...

We can continue to support - anything from portfolio management, cost cutting, supply chain setup/streamlining, delivering R&D projects, scaling production, maintenance & support, etc.
